AFTER PARTY ENTERTAINMENT

Caterpillar Logistics Services

Responsible for development and implementation of all aspects of the day-to-day operation of the organization's outbound and hazardous materials logistic operations in compliance with established policies and procedures. Responsible for ensuring employee conformance to established practices, proper employee training, preparing related reports and auditing procedures for improved efficiency. Managed HAZMAT training, documentation and reporting.

Ace Hardware Corporation

Developed and implemented a regional load IT solution to work in conjunction with the company's logistics/planning system. Scheduled the day-to-day movement of freight throughout the continental U.S. via freight, air and rail.

Nokia Mobile Phones

Supported all Demand/Supply Balancing (DSB), Materials Requirement Planning (MRP). Measured metrics and managed variances in relation to freight costs. Assisted purchasing in negotiation and control of rates, discounts, invoicing and performance of carriers. Reported daily shipment performance based on customer requirements.

Anixter

Created new warehouse business unit for management of new business projects comprised of 13 associates both clerical and warehouse. Established a cross-functional team comprised of Sales, Accounting, Information Management and Logistics to establish internal procedures and service level objectives used to direct and control flow of work. Was responsible for warehouse WMS configuration, RF implementation, manpower requirements, order fulfillment, and improving projected budget margins.

Mitsubishi Motor Manufacturing

Supervised the assembly, inspection and repair of production vehicles in a high-volume JIT lean manufacturing facility. Developed and improved KANBAN processes for Front Suspension and Final Assembly. Supervised units containing 18 to 36 production associates in adherence to the UAW collective bargaining agreement.
